### Permission to copy

The material in this book is copyright. However, the publisher grants permission for copies of the pages in the sections entitled 'Games material' and 'Rules sheets' to be made without fee as follows:

Private purchasers may make copies for their own use or for use by classes of which they are in charge; school purchasers may make copies for use within and by the staff and students of the school only. This permission to copy does not extend to additional schools or branches of an institution, who should purchase a separate master copy of the book for their own use.

For copying in any other circumstances prior permission in writing must be obtained from Addison Wesley Longman Ltd.

# Introduction

## 1 About games

A game is an activity with rules, a goal and an element of fun.

There are two kinds of games: *competitive games*, in which players or teams race to be the first to reach the goal, and *co-operative games*, in which players or teams work together towards a common goal. The activities in this book are mainly of the latter kind, as the competitive element or the need for speed often distorts the language used. Suggestions have, however, been given for introducing a competitive element into certain games, as the teacher may find this useful on occasions.

The activities in this book are *communicative games*, as distinct from *linguistic games*; that is, they are activities with a non-linguistic goal or aim. Successful completion of the game will involve the carrying out of a task such as drawing in a route on a map, filling in a chart, or finding two matching pictures, rather than the correct production of a structure. However, in order to carry out this task it will be necessary to use language, and by careful construction of the task it will be possible to specify in advance exactly what language will be required.

The emphasis in the games is on successful communication rather than on correctness of language. Games, therefore, are to be found at the fluency end of the fluency-accuracy spectrum. This raises the question of how and where they should be used in class. Games should be regarded as an integral part of the language syllabus, not as an amusing activity for Friday afternoon or for the end of term. They provide, in many cases, as much concentrated practice as a traditional drill and, more importantly, they provide an opportunity for real communication, albeit within artificially defined limits, and thus constitute a bridge between the classroom and the real world.

This suggests that the most useful place for these games is at the free stage of the traditional progression from presentation through practice to free communication; to be used as a culmination of the lesson, as a chance for students to use the language they have learnt freely and as a means to an end rather than an end in itself. They can also serve as a diagnostic tool for the teacher, who can note areas of difficulty and take appropriate remedial action.

## 2 About this book

The games in this book have been specially written for beginners and elementary students – the tasks have been designed in such a way that only a very limited knowledge of the language is necessary to complete them.

Each game is written within a specific functional area and limited to one or two structures and a clearly defined lexical field. They can be used with beginners right from the very first lesson. The games are arranged in approximate order of difficulty, following a traditional structural progression, although teachers

may, of course, use the games in any order, following their own syllabuses. The games are listed on page 3 under functional headings, but there is a structural index for cross-reference at the back of the book. There is also an index to the main lexical areas covered in the games. Essential exponents and lexis for each game are listed in the teacher's notes, and the teacher should check that students are familiar with these before playing the game.

The games make use of a variety of techniques. Variety is important in language teaching, and a succession of games based on the same principles, though exciting and novel at first, would soon pall. Techniques used include information gap, guessing, search, matching, exchanging and collecting, combining, and card games, problems and puzzles, role play and simulation techniques.

The simplest activities are based on the *information gap* principle. In these activities Student A has access to some information which is not held by Student B. Student B must acquire this information to complete a task successfully. This type of game may be *one-sided*, as in the above example, or *reciprocal*, where both players have information which they must pool to solve a common problem. The games may be played in pairs or in small groups, where all the members of the group have some information.

*Guessing games* are a familiar variant on this principle. The player with the information deliberately withholds it, while others guess what it might be.

*Search games* are another variant, involving the whole class. In these games everyone in the class has one piece of information. Players must obtain all or a large amount of the information available to fill in a questionnaire or to solve a problem. Each student is thus simultaneously a giver and a collector of information.

*Matching games* are based on a different principle, but also involve a transfer of information. These games involve matching identical pairs of cards or pictures, and may be played as a whole class activity, where everyone must circulate until they find a partner with the same card or picture; or as a pair work or small group activity, where players must choose pictures or cards from a selection to match those chosen by their partner from the same selection; or as a card game on the 'snap' principle.

*Matching-up games* are based on a jigsaw principle. Each player in a group has a list of opinions, preferences or possibilities. Only one of these is shared by everyone in the group. Through discussion the group must decide on a common preference, in order to agree on something such as a dinner date or choice of afternoon activity.

*Exchanging and collecting games* are based on the 'barter' principle. Players have certain articles or cards which they are willing to exchange for others in order to complete a set. This may be played as a whole class activity, where players circulate freely, exchanging cards or articles at random; or as an inter-group activity, where players agree to collect a certain set of articles as a group and then exchange articles between groups; or as a card game on the 'rummy' principle.

*Combining activities* are those in which the players must act on certain information in order to arrange

themselves in groups such as families or people living in the same flat.

All the above activities may include elements of puzzle-solving, role-play, or simulation.

*Puzzle-solving activities* occur when participants in the game share or pool information in order to solve a problem or a mystery – what happened on Friday at Tom's party?, who lives in House No 5? etc.

Many games include an element of *role-play*. Players are given the name and some characteristics of a fictive character. However, these are not role-plays in the true sense, as the role-play element is always subordinate to the game for the purposes of language use. The role-cards in these games do not require the imaginative projection into character that is necessary in a role-play proper. The outcome of a game is 'closed'; once cards are distributed it develops in a certain predetermined way, while role-play proper is open-ended and may develop in any number of ways. The concern in this book was to restrict the language necessary for playing the games, so although it is impossible to make use of the full potentialities of role-play at this level, it is still an indispensable element in those games requiring an exchange of personal information, or social interaction.

*Simulations* – the imitation in the classroom of a total situation, where the classroom becomes a street, a hotel, or a supermarket – are also used a good deal in the book, particularly in those games which practise interaction between the individual and services such as shops, banks, tourist offices, stations and airports. However, for reasons discussed above, these activities are simulation-games rather than true simulations since the outcome is again 'closed': students have a specific task or series of tasks to complete within the context of the simulation.

### 3 Some practical considerations

There are three main types of activity in this book: *pair work*, involving two partners; *small group work*, involving groups of three or four; and *whole class activities*, where everyone moves freely around the room. All these activities require some flexibility in the constitution of groups and organization of the classroom. It is best to have the desks in a U-shape if possible. Students can then work with the person sitting next to them for pair work, and groups of threes and fours can easily be constituted by alternate pairs moving their chairs to the inner side of the U, opposite another pair. Whole class activities, which involve all the students circulating freely, can take place in the empty area in the centre of the U-shape. Simulation activities may involve special arrangement of furniture and suggestions are made in the teachers' notes for these activities. If it is not possible to arrange the desks in this way, this need not deter you! The traditional arrangement of front-facing desks can easily be adapted to pair work, with people at adjoining desks working together, while small groups can be formed by two people turning their chairs round to face the two people behind them. Whole class activities present a little more of a problem, but often there is a space big enough for students to move around in at the front of the class, or desks can be pushed back to clear a space in the centre.

Games are best set up, especially at this level, by demonstration rather than by lengthy explanation. The

teacher should explain briefly what the game involves, hand out the photocopied cards, giving the students a little while to study them, and then demonstrate the game with one of the students in front of the class. It will be found that the idea of the game is probably easier for students to grasp from seeing the cards than from a verbal explanation, and that as they become more familiar with the idea of games and the techniques used, any initial problems caused by unfamiliarity will quickly disappear. Where more complicated games are played in small groups, it is suggested that teachers hand out a photocopied rules sheet to each group of students together with the card(s). There is a reference in the teacher's notes for each game to indicate where rules sheets are provided. These are to be found at the back of the book, after the games material section.

The teacher's role in these activities is that of monitor and resource centre, moving from group to group, listening, supplying any necessary language, noting errors, but not interrupting or correcting as this impedes fluency and spoils the atmosphere. It is a good idea to carry paper and pen and to note any persistent errors or areas of difficulty. These can then be dealt with in a feedback session after the game. In many cases, the game could then be played again with different partners or with different role-cards. In other cases, mostly in those activities involving puzzle-solving, this will not be possible. However, a similar game with different information could easily be constructed to practise the same exponents, and suggestions have been made for this where appropriate.

### 4 The role of games in the language programme

The inclusion of games as an integral part of any language syllabus provides an opportunity for intensive language practice, offers a context in which language is used meaningfully and as a means to an end, and acts as a diagnostic tool for the teacher, highlighting areas of difficulty. Last, but certainly not least, although the above discussion has tended to focus on methodological considerations, one of the most important reasons for using games is simply that they are immensely enjoyable for both teacher and student.

# Teacher's notes

## 1

### Looking for Mr X

#### Type of activity

whole class  
information search

#### Function practised

asking for and giving personal information

#### Exponent

*What is his name/address/telephone number?*  
*What does he do?*  
*Is he married?*  
*What nationality is he?/Where does he come from?*

#### Lexical areas

occupations, nationalities, numbers

#### Essential vocabulary

*name, address, nationality, telephone number, occupation, marital status, bus driver, married, Australian, park, road numbers up to 20*

#### How to use the game

Photocopy the forms so that there is one for each student.

Give out one form to each student.

The object of the game is to complete the form. To do this, students must move around the class asking questions about Mr X until they have obtained enough information to complete the form.

Students may only ask each other one question at a time before moving on. They may pass on information that they have obtained from other students, as well as the information that was originally on their form.

## 2

### Chit-chat

#### Type of activity

whole class  
information search

#### Function practised

asking for and giving personal information

#### Exponent

*What's your name?*  
*Where do you live?*  
*How old are you?*  
*Are you married?*  
*How many children have you got?*  
*What do you do?*  
*What are your hobbies?*  
*Do you like ...-ing?*

#### Lexical areas

occupations, hobbies

#### Essential vocabulary

*age, married, single, divorced, child/children, job, technician, retired, electrician, nurse, policewoman, student, housewife, accountant, teacher, librarian, secretary, bank manager, actress, doctor, tennis, football, gardening, swimming, sailing, guitar, knitting, cooking, drinking, talking, judo, woodwork, painting, crosswords, piano, reading, art, pottery numbers 1 to 100*

#### How to use the game

The game may be played with any number (with a suggested minimum of seven or eight). If there are more than 16 students in the class, the game may be played in two groups. If there are fewer than 16 students in a group, questions should be deleted from the questionnaire and the corresponding role-cards removed.

Copy one role-card and one questionnaire for each student in the class. Distribute one role-card to each student and allow a little time for them to become familiar with the information.

Then give each student a questionnaire.

The object of the game is to find all the people described on the questionnaire. To do this, students must move around the room, asking each other questions until they have found all the people described on the questionnaire.

A similar game could be constructed by the teacher based on the students' own characters, provided that you know a little about their lives, occupations, interests and so on.

## 3

### The seven families game

#### Type of activity

whole class  
matching and combining

#### Function practised

talking about families

#### Exponent

*What is your/your wife's/husband's/daughter's/son's name?*  
*Where do you live?*  
*How old are you/your children?*  
*How old is your husband/wife?*  
*How many children/brothers and sisters have you got?*

#### Lexical area

family relationships

#### Essential vocabulary

*mother, father, sister, brother, children, wife, husband, parents numbers 1 to 50*

#### How to use the game

The game may be played with 4 to 25 students. If there are over 25 students in the class, the game may be played in two groups.

There are seven families described on the cards:

- 1 John, Mary, Peter and Jill (Bristol)
- 2 John, Mary, Peter and Jill (Newcastle)

- 3 Steve and Mary (aged 23)
- 4 Steve and Mary (aged 25)
- 5 Steve, Anne, Tom, Pat and Robert (Newcastle)
- 6 Steve, Anne, Tom, Pat and Robert (Bristol)
- 7 John, Anne and Peter

Copy one card for every student in the class, but make sure that the total adds up to a number of complete families.

Give out the cards to the students and allow a little time for them to familiarize themselves with the details on the cards.

**The object of the game is for everyone to find the other members of their family.** To do this they must move around the room, asking questions to identify the other members of the family.

Emphasize that students should try to find out *all* the information about the people they think may belong to their family.

## 4

### How many?

#### Type of activity

pair work  
information gap

#### Function practised

counting

#### Exponent

*How many... are there?*

*There are... (+ numbers up to 20)*

#### Lexical areas

numbers up to 20, kitchen objects

#### Essential vocabulary

*teapot, pan, fork, knife, spoon, cup, saucer, glass, plate,*

*bowl, spider*

numbers 1 to 20

#### How to use the game

Divide the class into pairs and copy enough pictures for each pair.

Give out the pictures so that one student in each pair has picture A and the other has picture B.

**The object of the game is to find out who has the most things in the kitchen.** To do this, A and B will have to ask each other how many teapots, pans, forks, knives, spoons, cups, saucers, glasses, bowls and plates there are in their kitchens and add up the total.

When they have done this, they can find out who has the most spiders!

## 5

### Time zones

#### Type of activity

small group  
information gap

#### Function practised

asking and telling the time

#### Exponent

*What's the time?/What time is it in...?*

*It's... (+ times)*

#### Lexical areas

numbers, times

#### Essential vocabulary

times, eg *It's ten to nine, It's half past one.*

#### How to use the game

The game may be played in groups of three or four.

Copy one set of information cards (1-4), one set of time cards and one rules sheet for each group.

The groups should sit around a table.

Each player in the group should have one information card.

The 12 time cards should be placed face down in the middle of the table.

For groups of three, the spare information card should be placed face up in the middle of the table and players should take turns in answering using that information.

Each player should take it in turns to pick up a time card from the middle of the table. The card will show what time it is in one of the four countries.

**The object of the game is to fill in the time on the blank clock faces on each time card.** To do this the player must find out from the other members of the group what the time is in each of the other four countries, asking, for example, *It's four o'clock in Sydney. What's the time in London?*

## 6

### Where are my glasses?

#### Type of activity

small groups  
information gap

#### Function practised

asking and replying where things are

#### Exponent

*Where's/Where are my...?*

*It's/They're in/on/under/on top of/near/next to/in front of/behind the...*

#### Lexical areas

furniture, common household objects and personal possessions

#### Essential vocabulary

*radio, pipe, glasses, cushion, paper, umbrella, record, book, glass, socks, football, comb, handbag, pen, cigarettes, gloves, hairbrush, hat, teapot, knitting, cup, shopping basket, slippers, purse; TV, carpet, fireplace, mantelpiece, sofa, armchair, table, chair, waste-paper basket, wall, bookcase, lamp; in, on, under, on top of, near, next to, in front of, behind, to the right/left of*

#### How to use the game

This game can be played in groups of three or four. For groups of three, leave out Jenny.

Copy one set of cards for each group.

Divide the students into groups of three or four and give out the cards.

Tell the students that they belong to a very untidy

family and are always losing things. The large picture on their card shows their family living room. The small pictures show things they have lost. **The object of the game is for each player to find out from the others where these things are, and to draw them in on his/her picture.** One player should begin the game by asking, *Where is/are my . . . ?* and naming one of the lost objects. The first player to answer gets the next turn.

## 7

### Crossroads

#### Type of activity

small groups  
information gap

#### Function practised

asking and replying where places are

#### Exponent

*Where's/Where are . . . ?*

*The . . . is next to/opposite/behind/in front of/between/on the right of/on the left of/the . . .*

#### Lexical areas

shops and public facilities

#### Essential vocabulary

*ironmonger, baker, hotel, café, greengrocer, newsagent, car park, post office, chemist, petrol station, cinema, shoe shop, hairdresser, restaurant, sweet shop, cathedral, dress shop, grocer, station, bus station, florist, butcher, bank, tobacconist; next to, opposite, behind, in front of, between*

#### How to use the game

This game may be played in groups of three or four. For groups of three, leave out plan 4. Copy one set of plans and one rules sheet for each group.

Divide the students into groups of three or four and give out the plans and rules sheets.

**The object of the game is to fill in the names of all the places on the plan.** To do this, students must pool the information they have on their individual plans. They should take it in turns to offer information about their plans to the rest of the group; each player should in turn make a statement about the plan, for example, *The post office is next to the bank.*

The other players should then fill in the information on their plans.

Sometimes players will not be able to use the information immediately – if they do not yet know where the bank is, for example. They may then make a note of the information for future use.

The game is finished when all the players have completed their plans.

## 8

### The recipes game

#### Type of activity

whole class (in four groups)  
exchanging and collecting

#### Function practised

asking for things

#### Exponent

*Have you got any . . . ?*

*I'd like some . . .*

*How much/How many would you like?*

#### Lexical areas

food, weights and measures

#### Essential vocabulary

*eggs, butter, salt, pepper, milk, flour, cheese, sugar, chocolate, vanilla, water*  
numbers and amounts

#### How to use the game

The game may be played with any number of students. Copy one set of recipes and one set of ingredients cards. Divide the class into four groups.

Each group should have a clearly-defined home base – a table and chairs in a corner of the room.

Give each group one recipe and five randomly selected ingredients cards.

**The object of the game is for each group to obtain the ingredients necessary to make its recipe.**

Each group should first read its recipe and underline the five ingredients necessary for making it.

They may obtain these ingredients by exchanging cards with other groups. They must obtain exact amounts.

One person should leave each group with a card they wish to exchange and go to another group in order to try and exchange that card for a necessary ingredient card.

No group may send out or receive more than one person.

The first group to obtain all the ingredients necessary for its recipe is the winner.

**Note:** If students are unfamiliar with imperial weights, the teacher should alter the weights to appropriate metric weights on the master before copying.

## 9

### Shopping lists

#### Type of activity

whole class  
exchanging and collecting

#### Function practised

asking for things in shops

#### Exponent

*Have you got any/a . . . ?*

*How much/many do you want?*

#### Lexical areas

food, chemist's items, amounts, containers

#### Essential vocabulary

*butter, pears, eggs, coffee, salt, milk, biscuits, lettuce, rice, apples, peas, bananas, chocolate(s), carrots, chicken, oranges, crisps, jam, strawberry, raspberry, sugar, beef, flour, lemon, cheese, onions, potatoes, steak, bread, tea, shampoo, toothpaste, yoghurt, cabbage, soup, mushrooms, tomatoes, sardines, spaghetti; jar, packet, carton, bar, piece, tin, box, joint, bottle, loaf, tube*  
numbers and weights

### How to use the game

The game may be played with any number of students. Copy enough shopping lists – one for every student in the class.

Then copy the picture cards. Make sure that there is a picture card for every item on the lists.

Give each student a shopping list and four randomly selected picture cards.

**The object of the game is for each student to acquire the items on the list.** To do this, they must move around the class asking other students for the things they need. They should specify the quantities they need: for example, *Have you got any raspberry jam? Yes, how much do you want? Two jars.*

**Note:** If students are unfamiliar with imperial weights, the teacher should alter the weights to appropriate metric weights on the master before copying.

## 10

### Shopping around

#### Type of activity

small groups  
information gap

#### Function practised

asking and saying how much things cost

#### Exponent

*How much is/are ...?*

#### Lexical areas

food, chemist's items, prices

#### Essential vocabulary

*beans, potatoes, cucumber, apples, grapefruit, peaches, bacon, chicken, liver, mince, vegetable soup, apricot jam, peas, margarine, cheese, eggs, soap, soap powder, razor blades, aspirin; kilo, jar, packet, tin, dozen, bottle, bar prices, weights and numbers*

### How to use the game

This game may be played in small groups of three or four students.

Copy one set of shopping lists, one set of supermarket prices and a rules sheet for each group.

Divide the class into groups and give each student a shopping list and a price list.

**The object of the game is for the students to decide where to buy each item on their lists.** To do this, they must ask the price of each item in turn from the other supermarkets, compare it with their own price list and decide which is the cheapest.

They should then calculate the amount spent and write it beside the item on their list.

At the end of the game they should add up the totals and find out who spent the most (or the least!) on shopping.

The game may be done as a race between the different groups in the class, to improve fluency in dealing with numbers in English.

**Note:** If students are unfamiliar with imperial weights, the teacher should alter the weights to appropriate metric weights on the master before copying.

## 11

### Home sweet home

#### Type of activity

whole class  
matching

#### Function practised

describing houses and flats

#### Exponent

*What's your house like?*

*Has it got a ...?*

*How many ... has it got?*

*It's ...*

*It's got a ...*

#### Lexical areas

names of rooms, adjectives for describing houses

#### Essential vocabulary

*bedroom, kitchen, living room, dining room, bathroom, study, attic; terrace, bungalow, detached, semi-detached, flat, cottage, garden*

### How to use the game

The game may be played with any number of students. Copy two pictures for each student in the class: one of their old house and one of their new house. Ensure that there is an old house to match every new house that you copy.

Give every student a picture of their old house and a picture of their new house (make sure the two are not the same!)

**The object of the game is for everyone to find the person now living in the house where they used to live.** To do this, they must move around the class, asking people to describe their present houses until they find the person living in their former house.

## 12

### My home town

#### Type of activity

whole class  
matching

#### Function practised

describing places

#### Exponent

*Where do you come from?*

*Where is it?*

*It's in the north/south/east/west of England.*

*What's it like?*

*It's a ... town.*

*It's got a ...*

#### Lexical areas

features of towns, adjectives for describing towns, compass points

#### Essential vocabulary

*north, south, east, west, north-east, north-west, etc. university, cathedral, castle, walls, art gallery, palace, church, shop, theatre, concert hall, shopping centre, museum, station, factory, pub, school, beach, streets; historic, industrial, port, country, capital, village, seaside*

### How to use the game

The game may be played with any number of students. Copy one map and one place description for each student in the class and give them out.

The students should read the place description and look at the map to decide which town it describes.

They should write the name of the town in the right place on the map and draw a line to connect the town with the appropriate plan.

When the students have finished, collect in the place description cards.

Tell them that they must now find out the names of the other towns on the map, and decide which plan belongs to which town.

**The object of the game is to identify the towns from the maps and place descriptions.** To do this they must ask students where they come from, where their town is and what it is like.

A similar game could be played using information about the students' own home towns.

Ask the students to write a short passage describing their home town.

Collect these in and use the information to prepare a questionnaire with questions such as: *Who comes from a small mountain village in southern Switzerland? Who comes from an industrial town?*

Students should then interview each other to find the answers.

## 13

### Lost umbrellas

#### Type of activity

whole class  
collecting and exchanging

#### Function practised

describing objects

#### Exponent

*What's it like?*  
*It's ... (+ adjective)*  
*It's made of ...*  
*It's got ...*

#### Lexical area

adjectives describing shape, size, pattern, material

#### Essential vocabulary

*round, square, long, short, big, small, oval, rectangular, tall, wide, narrow; plain, striped, spotted, flowery, checked; made of paper/string/leather/straw/wool/cloth; with round handles/a feather/flowers/a ribbon*

### How to use the game

The game may be played with any number of students. Copy the large pictures so that there is one for each student.

Then copy the small pictures of umbrellas, hats, bags and glasses.

Select the objects in the small pictures to correspond with those that you have chosen in the large pictures.

Place the cards in five piles (large pictures, hats, umbrellas, bags and glasses) at the front of the room, and arrange the chairs in pairs around the room.

The students should take one picture from each pile and go and sit in pairs.

Tell the students that they all went to a party last night. When they arrived at the party they possessed the objects shown in the large picture. Unfortunately they ended up taking the wrong things home with them.

It is now the morning after and they are trying to reclaim their lost possessions.

**The object of the game is to find the four missing possessions.** To do this they will have to 'telephone' everyone who was at the party to see if they have taken their things.

They should start by ringing the student next to them and describing their possessions.

If the student has a small picture which corresponds to the one in the description, it should be handed over.

When both students have finished their descriptions, they should move on and find other partners and continue in this way until they have found the four small pictures which match the bag, umbrella, hat and glasses in their large picture.

## 14

### Family portraits

#### Type of activity

small group  
information gap

#### Function practised

describing people's faces

#### Exponent

*What's your mother/father/sister/brother like?*  
*He's/She's ...*  
*He's/She's got ...*  
*Is he/she ...?*  
*Has he/she got ...?*

#### Lexical areas

facial features, adjectives describing size and shape

#### Essential vocabulary

*tall, short, fat, thin, straight/curlly/long/short/blonde/dark hair, plaits, glasses, moustache, beard, bun*

### How to use the game

The game may be played in groups of three or four.

For groups of three, leave out one of the cards and tell the groups that four of the faces on their cards will not belong to any of their families.

Copy one set of pictures for each group in the class.

Divide the class into groups and give out the pictures.

Tell the students that the picture of the family group on their card represents their own family and the pictures with silhouettes represent the families of the other players.

**The object of the game is to find out which family group belongs to each player, and which face belongs to each silhouette.** To do this, students will have to describe their families to each other.

For groups of three, students may each describe their families in turn; for groups of four it is best if students describe one person each in turn.

A similar game could be played using the students' own family photos.

Ask the students to bring in one photo of each member of their families.

They should sit in groups of three or four and put all the photos face down in a pile in the middle of the group.

They should then shuffle the pile thoroughly and lay the photos out face up in a row.

Each student should then describe their family, and the others should decide which photos belong to that family.

## 15

### Wallflowers

#### Type of activity

pair work  
information gap

#### Function practised

describing people's clothes

#### Exponent

*Who is the ... girl/man?*

*Who is the girl/man with the ...?*

*Which one?*

*The ... one.*

*The one with ...*

#### Lexical areas

clothes, adjectives describing physical appearance

#### Essential vocabulary

*moustache, glasses, beard, blond, dark, straight, curly, long, short, hair; dress, jeans, blouse, skirt, shirt, trousers, shoes, suit, boots, jacket, T-shirt, pullover*

#### How to use the game

Copy enough pictures for all the students in the class.

Divide the class into pairs and give out copies of the pictures A and B to each pair.

They should not look at each other's pictures.

Tell the students that they are at a party with a friend.

They know the names of some of the people at the party, but not others.

**The object of the game is to find the names of all the people at the party.** To do this, they must describe the people they don't know to their partner, and ask who they are.

## 16

### Looking for a hotel

#### Type of activity

whole class  
simulation

#### Function practised

reserving hotel accommodation

#### Exponent

*Have you got/Can I have a single/double room with shower/bath for one/two/three nights?*

*How much is a single/double room?*

#### Lexical area

hotel accommodation

#### Essential vocabulary

*single, double, twin-bedded room, shower, bath numbers, prices*

#### How to use the game

The game may be played with any number of students. Four students will be hotel receptionists and the rest will be tourists looking for hotel rooms, although if you have a large class – 20 or over – it would be better to have two receptionists at each desk to deal with queues. Copy one hotel list for each receptionist and one tourist card for each tourist.

Clear the desks and chairs from the middle of the room and situate four hotel reception desks in different corners of the room. The receptionists should sit behind these.

Give each receptionist a different hotel room list and give out the tourist cards to the remaining students.

**The object of the game is to find the cheapest possible hotel room for the night.** To do this, students will have to visit each hotel in turn to enquire about availability and prices of rooms. They should then return to the hotel of their choice to make a firm booking.

There is always the possibility that the room of their choice may have been taken while they were making up their minds. They will then have to make a second choice.

If you want to increase the element of competition in the game with a small class, cross out some of the rooms on the hotel lists as if they were already taken.

## 17

### Getting there on time

#### Type of activity

whole class  
simulation

#### Function practised

asking for travel information

#### Exponent

*Is there a train/bus/plane to/from ... in the morning/afternoon/evening?*

*What time/When does it leave/arrive?*

#### Lexical areas

times, 24-hour clock, places

#### Essential vocabulary

*airport, zoo, bus station, town centre, hospital, football match, theatre, meeting, sports centre, bus stop, meet, visit, catch, arrive, leave, see, take, go, finish, fly, start, swim, walk, must, need*  
days of the week, times (24-hour clock)

#### How to use the game

Clear desks and chairs from the centre of the class. Divide the class into two groups.

Divide one half into three groups and the other into groups of three and four.

Set up three desks in different areas of the room to represent bus station, railway station and airport.

The three groups should act as information officers in these three places.  
Give each information officer an appropriate timetable. Give each of the other groups a set of task cards, a blank answer sheet with numbers on it from 1 to 20 and a rules sheet.

**The object of the game is for each group to answer all the task cards correctly.** To do this the groups of students should work through the task cards in turn, going to the appropriate enquiries desk to ask about bus, train or plane times.

When they have completed a task they should write the time on the answer sheet. The teacher can then go through the answers at the end of the game.

When all groups have finished, the two halves of the class could change places and repeat the game.

## 18

### The bus stop game

---

**Type of activity**

whole class  
simulation

**Function practised**

asking for travel information about buses

**Exponent**

*Where does the 45 go from?  
Does the 45 stop at Church Street?  
Which bus goes to Church Street?  
When/What time is the next bus?  
How often does the bus go?*

**Lexical areas**

transport, numbers

**Essential vocabulary**

*bus station, church, castle, museum, harbour, university, hospital, station  
numbers, times*

---

**How to use the game**

The game may be played with any number of players from a minimum of six.

Cards 1 to 8 are *queuer cards* – role-cards giving information about times and numbers of buses. Students with these cards should stand at the appropriate bus stop.

Cards 9 to 24 are *searcher cards* – role-cards with questions about times and numbers of buses.

**The object of the game is for students with searcher cards to find a particular bus stop.**

Select and copy the cards you are going to use.

There should be twice as many students looking for bus stops as students queuing at the stops.

Ensure that the information desired by the searchers is available on the queuer cards you have selected!

Clear the desks and chairs and arrange four bus stops at suitable intervals. Label these A, B, C and D.

Give out the cards and allow a little time for the students to read the cards and absorb the information.

Ask the queuers to go and stand at the right bus stops, and then tell the searchers to find their buses.

During the course of the game searchers will, of course,

become queuers and may then pass on any information they have acquired while looking for their bus stops. Teachers may prefer to construct their own set of cards, based on authentic bus numbers and destinations from the town where they are teaching.

**Note:** It is good idea to place the bus stops along an imaginary road or at a junction. Students can then give directions such as *round the corner* or *across the road*.

## 19

### Visiting friends

---

**Type of activity**

small group  
information gap

**Function practised**

asking the way and giving directions

**Exponent**

*How do I get to ...?  
Turn left/right.  
Go straight on.  
Take the first/second/third turning on the right/left.*

**Lexical areas**

directions, traffic systems

**Essential vocabulary**

*left, right, first, second, third, turning, road, station, corner, side*

---

**How to use the game**

This game may be played in groups of any size from three to eight, although obviously the larger the group the more language will be practised.

Divide the class into groups with about the same number of students in each group and copy one set of maps for each group. (For groups of three, use only maps A, B and C; for groups of four use only maps A, B, C and D, and so on.)

Give out the maps and tell the students a mutual friend of theirs is arriving at the station and visiting each of their houses in turn.

Their job is to give directions for each stage of the journey. Student A should start and, following the instructions on the map, should give directions from the station to the house on the map.

**The object of the game is for students to listen to the instructions and draw in the route on their maps.**

Then Student B should give directions from A's house to B's house and so on until the students have the complete route marked in on their maps.

Finally, ask the students to write down the directions from the last house back to the station.

## 20

### Planning a day out

---

**Type of activity**

pair work  
information gap

**Function practised**

asking about opening and closing times

### Exponent

*What's on at . . . tonight?*

*What time does it open/close/start/finish?*

### Lexical areas

times, public buildings and facilities

### Essential vocabulary

*museum, market, art gallery, cathedral, theatre, shopping centre; arrive, leave, open, close, start, finish*

months, days, times

## How to use the game

Copy a role-card and a map for every student in the class.

The students should sit in pairs facing each other across a table.

Give each student an appropriate role-card and a map. Student A has a list of things to do and see on a visit to York. Student B has a guide to entertainments and facilities in York.

**The object of the game is for student A to find out what the possibilities are and to plan the day.** To do this, student A must ask student B for information about opening/closing/starting/finishing times of the shops, museums, plays in York, in order to decide what can and cannot be done in the time available.

Student A must draw in a route of the day's wanderings on the map.

## 21

# Wandering tourists

### Type of activity

whole class  
simulation

### Function practised

asking for tourist information

### Exponent

*How do I get to . . . ?*

*Turn left/right.*

*When/What time does the . . . open/close/arrive/leave?*

*It opens/closes/arrives/leaves at . . .*

*How much is a single/return ticket to . . . ?*

*Can I change . . . into . . . please?*

*Can I have/Have you got a single/double room for . . . nights, please?*

### Lexical areas

directions, public buildings, transport, banks (currency), hotels

### Essential vocabulary

*bank, station, tourist office, museum, hotel, art gallery, shopping centre, bank, zoo, abbey, castle, aquarium, single, return, single/double room, shower, bath*  
times, prices, directions

## How to use the game

This is an elementary simulation, designed to provide further practice in language already practised in *Visiting friends* (directions), *Planning a day out* (asking when places open and close), *Getting there on time* (asking for travel information), *Shopping around* (asking about prices) and *Finding a hotel* (reserving a hotel room).

The simulation may be done with a minimum of eight students. Four students will act as tourist information officer, railway booking clerk, hotel receptionist and bank clerk.

Copy an appropriate information card for each of these students.

The remaining students are wandering tourists. Copy a task sheet and map for each of these students.

If there are more than 15 or 16 students in your class it may be as well to have two students in the hotel, bank, tourist office and station to deal with the queues.

Clear the room of desks and chairs and set up four desks in different corners of the room to represent the bank, tourist office, station and hotel, and put students in these places with appropriate information cards.

Give each of the lost tourists a task sheet with appropriate map.

**The object of the game is for students to carry out the instructions in the order in which they appear on the sheet.**

Students should find out from someone in the street where the hotel, bank, tourist office and station are *on the map* and mark them in on the map, before going to these places.

## 22

# Computer dating

### Type of activity

whole class  
matching

### Function practised

talking about likes and dislikes

### Exponent

*I like/don't like . . .*

*I like/don't like . . . -ing.*

*So do I/Neither do I/I don't*

*Do you like . . . ?*

*Do you like . . . -ing?*

*Yes, I do/No, I don't*

### Lexical areas

sports and hobbies

### Essential vocabulary

*riding, gardening, swimming, tennis, skiing, golf, cycling, cooking, reading, football*

## How to use the game

The game may be played with any number of students, with a suggested minimum of six.

Copy enough cards for all the students in the class.

Make sure each role-card appears at least twice.

Give out the cards to the students and tell them that **the object of the game is to find the perfect partner.** They should try to find someone whose likes and dislikes are exactly the same as their own.

To do this they should move around the class interviewing people about their likes and dislikes until they find someone whose tastes match theirs.

## 23

### Commuters

---

**Type of activity**

pair work  
information gap

**Function practised**

asking and talking about travelling to work

**Exponent**

*Where do you/does he/she live/work?*

*I live/work in ...*

*He/She lives/works in ...*

*How do you/does he/she get to work?*

*I drive/walk/cycle/go by bus/train/car/bike/taxi.*

*He/She drives ...*

*How far is it?*

*It's ... miles.*

*How long does it take?*

*It takes ... minutes.*

**Lexical areas**

places of work, means of transport, compass points, numbers

**Essential vocabulary**

*north, south, east, west, north-east, north-west, south-east, south-west; bicycle, train, bus, taxi, motor cycle, car, factory, restaurant, garage, bank, library, office, hospital, shoe shop, chemist, café, school, hotel, post office, supermarket, hairdresser's, travel agent*  
numbers

---

**How to use the game**

Copy one picture sheet and one reading card for everyone in the class, and give them out.

The students should first of all read the information on the reading card and decide which pictures on the picture sheet are referred to.

They should then draw lines connecting one house with the people who live in it and the people with their places of work.

They should then write in along these lines the distance and the travelling time from the house to each place of work.

When they have finished, collect in the reading cards and group the students in pairs – A and B should work together, C and D should work together.

**The object of the game is to find out all the available information about all the people in the picture sheet and complete it by drawing lines from each person to their place of work and writing in the distance and travel times.**

They should ask each other questions about the people in their families – where they live and work, how they get to work, how long it takes and how far it is, filling in the picture sheet in the same way as they did from the reading card.

When they have finished, regroup the pairs so that A and C work together and B and D work together.

They should then share all the information they have collected and so complete the sheet.

The teacher can make the game into a race between groups by asking *Who has the longest journey? Who has the shortest journey?* The first group to find out is the winner.

## 24

### Flatmates

---

**Type of activity**

whole class  
matching

**Function practised**

asking and talking about habits and daily routines

**Exponent**

*Do you ...?*

*When do you ...?*

*I ... early/late/in the evening/every day.*

**Lexical area**

everyday activities

**Essential vocabulary**

*smoke, drink, get up, go to bed, read, watch (TV), play (the violin/guitar/trumpet), like, clean, invite, give, love, eat, wash up, spend (time), cook, give up, go out, practise, work, sleep, belong to, type, write; tidy, untidy, busy, active, heavy (smoker), social life, alone, diet;*  
qualifying words: *often, never, a lot, early, late, not much, etc.*

---

**How to use the game**

The game may be played with any number of students, with a suggested minimum of six.

Copy the cards so that there is one for each student.

Make sure that each role-card appears at least twice.

Give the cards to the students and tell them that they are all looking for someone to share a flat with them.

**The object of the game is to find someone with whom you can live in peace!**

Students should interview each other about their habits and daily routines until they find someone whose lifestyle is the same as their own.

If you have an odd number in your class, either one person will be left without a flatmate or you can specify that more than two people can share a flat together.

## 25

### Habits and hobbies

---

**Type of activity**

whole class  
information search

**Function practised**

talking about hobbies

**Exponent**

*Do you ...?*

*How often do you ...?*

*When do you ...?*

*I ... once/twice a day/week/month/year.*

*I ... every day/morning/afternoon/evening.*

*... at weekends*

*... on Sundays/Wednesday evenings*

*... in the afternoons/mornings/evenings*

*... in the summer/winter*

**Lexical areas**

hobbies, sports and pastimes

### Essential vocabulary

*exercise, cycling, golf, riding, tennis, swimming, walking, climbing, skiing, flying, diving, painting, drawing, pottery, sculpture, photography, parachuting, dancing, cooking, sewing, knitting, woodwork, piano, violin, listening to records/the radio, reading, watching TV, writing letters, fishing, yoga, gardening; like, go, play, practise, listen, paint, draw, do, want, cook, sew, knit, try, read, watch, write, listen*

### How to use the game

The game may be used with any number of students from eight upwards. Copy enough cards and questionnaires for everyone in the class. The relevant information is on cards 1 to 8, so ensure that these are included in the cards you copy. Give out one card and one questionnaire to every student in the class. The object of the game is to fill in the questionnaire. To do this, students will have to move round the class, asking questions such as, *Do you play the piano? How often do you watch TV? When do you play golf?*

**Note:** A similar game could be constructed using information about the students' hobbies and interests. Ask the students to write a short piece about their hobbies and interests, saying how often they do each of the activities they mention. Collect these in and use the information to prepare a short questionnaire similar to the one in this game.

It is also possible to use the cards for a matching game. Copy one card for every student in the class but make sure that you include a counterpart from cards 9 to 16 for every one of the cards 1 to 8 that you use. Give one card out to each of the students, and tell them to interview people about their hobbies and interests until they find someone with the same interests as they have. They should then try to find the differences in their habits. The first part of the game will involve the questions, *Do you ...?* and *Do you like ...?*; the second part will involve the questions, *How often do you ...?* and *When do you ...?*

## 26

### Finding a date

#### Type of activity

pair work  
information gap

#### Function practised

making arrangements – inviting, accepting and refusing

#### Exponent

*Can you/Would you like to come to dinner on ...?*  
*How/What about ...?*  
*I'm sorry I'm ... -ing.*  
*I'd love to.*

### Lexical areas

entertainment and social activities

### Essential vocabulary

*dinner, party, coffee evening, cinema, drink, dance, go, have, come, meet*  
days of the week, times

### How to use the game

Copy enough diaries for all the students in the class. Ask the students to sit in pairs facing one another and give out the diaries. Tell the students that these are their engagement diaries for the coming week. Student A wants to invite student B for dinner one evening. The object of the game is for the two to find a mutually convenient date. To do this, they should enact a telephone conversation where A rings B up to suggest having dinner. They should take it in turns to suggest possible dates. The game is finished when the arrangements are complete.

## 27

### Socializing

#### Type of activity

whole class  
matching up

#### Function practised

making arrangements – inviting, accepting and refusing

#### Exponent

*Can you/Would you like to come to ... on ...?*  
*How/What about ...?*  
*I'd love to.*  
*I'm sorry I'm ... -ing.*

#### Lexical areas

entertainment and social activities

#### Essential vocabulary

*cinema, theatre, pub, concert, restaurant, disco, bowling alley, etc.*  
days of the week, times

### How to use the game

Copy enough diaries for all the students in the class. Give each student a blank diary and write a list of seven different places on the board, for example, cinema, theatre, restaurant, pub, concert, disco, bowling alley. Tell the students that they want to go out every night to a different place. They must go out with a different person every night, and they may not go to more than one place or out with more than one person on any night. The object of the game is for each student to make arrangements and write them in their diaries. When they have filled up their diaries and returned to their places, they should discuss their social programme with the person sitting next to them.

## 28

# Sunday afternoon

in memoriam T Hancock

### Type of activity

small group  
matching up role-play

### Function practised

making suggestions and stating preferences

### Exponent

*Shall we ...?*

*Let's ...*

*How/What about ... -ing?*

*I'd rather/prefer to ...*

*I don't want to ...*

*That's a good idea!*

### Lexical areas

sport and pastimes

### Essential vocabulary

*castle, picnic, cycling, riding, tennis, TV, chess, music, cards, bowling, skating, cinema, zoo, seaside, sailing, radio, museum, art gallery, go, play, watch, visit, listen*

### How to use the game

Divide the class into groups of three or four and copy one set of role-cards, one set of situation cards and a rules sheet for each group.

For groups of three leave out role-card D.

The players should sit round a table with the situation cards face down in a pile in the middle of the table. The cards should be in order from 1 to 6.

Each player should have a role-card, A, B, C or D.

Tell the students that it is Sunday afternoon and they are sitting at home feeling rather bored.

They should turn up the first situation card and, acting on the instructions on that card, make suggestions of things to do, based on the list of preferences on their role-cards.

**The object of the game is to continue making suggestions of things to do until they find something that they all agree on.** When they have reached agreement, they should turn up the next situation card and continue as before.

The game is finished when they have successfully decided on something to do.

## 29

# Looking for a job

### Type of activity

whole class  
matching

### Function practised

asking and talking about abilities

### Exponent

*Can you ...?*

*Yes, I can/No, I can't ...*

*I can ...*

### Lexical area

abilities

### Essential vocabulary

*swim, speak, type, draw, paint, play (the piano/violin), play tennis, sing, ride, ski, sew, cook, drive, read music, take shorthand; teacher, secretary, journalist*

### How to use the game

The game may be played with any number of students. Copy enough cards for everyone in the class, but make sure that for every employee's card there is a corresponding employer's card.

Give out one card to everyone in the class.

**The object of the game is for every employee to find a job, and for every employer to find a suitable person for the job.** To do this, employers will have to move around the class, interviewing candidates for the jobs. They should only take candidates who fulfil all the requirements listed on the advertisement.

The game is finished when everyone has a job.

If you have an odd number of students in the class, either one student will be left without a job, or, if you think this is too cruel, you should alter one of the advertisements to read, *Wanted - two ... s.*

## 30

# Do me a favour

### Type of activity

small group  
card game

### Function practised

requesting, agreeing and refusing

### Exponent

*Can/Could you ...?*

*Yes, of course.*

*Sorry, I'm busy/I can't at the moment.*

### Lexical area

household tasks

### Essential vocabulary

*clean (the window/floor/coat/carpet), sweep (the floor), mend (the vase/window), post (the letter), empty (the bin/ashtray), clear (the table), put away (the records), tidy, make the bed, do the washing-up/the shopping, make the coffee, open (the door), close (the window), wash (the clothes), mow the lawn, paint (the room), answer (the telephone)*

### How to use the game

Divide the class into groups of three or four and copy one set of cards and a rules sheet for each group.

The cards are divided into *request cards*, showing an action that needs doing, and *reply cards*, showing the completed action.

*Request cards* have a question mark  in the top right-hand corner; *reply cards* have a tick .

**The object of the game is for players to collect matching pairs of request and reply cards.**

The players should sit in their groups around a table and deal out ten cards to each player. The remaining cards should be placed face down in a pile in the middle of the table.

The players should look at their cards and sort out any matching request and reply cards. These should be discarded.

The players then take it in turns to make requests based on the cards in their hand. The request may be addressed to anyone in the group.

When players have a reply card that corresponds to the request, they should give it to the player making the request with an appropriate response.

If they do not have such a card they should refuse the request with an appropriate response.

When a request is complied with, both cards should be discarded. When a request is refused, the person requesting should take another card from the pile in the middle.

The winner is the player who gets rid of all his/her cards first.

## 31

### Where am I?

**Type of activity**  
small group  
guessing game

**Function practised**  
asking what is possible/permitted

**Exponent**  
*Can you ...?*  
*Yes, you can/No, you can't.*  
*You must/mustn't ...*

**Lexical area**  
everyday activities

**\*Essential vocabulary**  
*eat, walk, drink, talk, sleep, play tennis, change money, swim, read, buy, smoke, get up, go out, leave, see, dance, watch TV, etc.*

#### How to use the game

Divide the class into groups of three or four and copy one set of cards for each group.

Students should sit in groups around tables with the cards placed face down in the middle of the group. They should take it in turns to pick up cards from the pile. The player who picks up the card should look at the picture and make a statement about what is possible or permissible in that place, for example, *You mustn't speak there, You can read there, etc.*

**The object of the game is for the others to guess where the place is.**

They may ask further questions about what is possible or permitted in the place, for example, *Can you eat there? Can you swim there?*

When they have guessed correctly the next player should pick up another card.

**Note:** This game is best set up by demonstration. Give one of the cards to a student and ask the questions yourself. Then take one of the cards yourself and get the class to ask you similar questions until they guess correctly.

\* As this is a guessing game it is difficult to predict in advance exactly what vocabulary will be required. The verbs suggested are a basic minimum.

## 32

### Landladies

**Type of activity**  
whole class  
matching

**Function practised**  
asking for and giving permission

**Exponent**  
*Can I ...?*  
*Yes, you can/No, you can't.*

**Lexical area**  
household activities

**Essential vocabulary**  
*play (records), use, smoke, drink, invite, bring, put, cook*

#### How to use the game

The game may be played with any number of students. If there are more than 20 students in the class, copy extra *tenant cards* and specify that landladies may have more than one tenant.

Give out one card to each student.

Make it clear who is a landlady and who is a tenant.

**The object of the game is for all the tenants to find a suitable landlady.** To do this, they must move around the class asking what is and is not permitted by the various landladies until they find one who will let them do everything they want.

The game is finished when everyone has found the ideal place to live.

## 33

### Feelings

**Type of activity**  
pair work  
information gap

**Function practised**  
describing feelings

**Exponent**  
*He/She looks/feels ...*

**Lexical area**  
adjectives for describing feelings

**Essential vocabulary**  
*sad, happy, tired, angry, worried, surprised, ill, bored, puzzled, frightened, hot, cold*

#### How to use the game

This game uses the same numbered frame as game 34 *How does it feel?*

Copy one frame, one set of pictures and a rules sheet for each player.

The students should sit in pairs facing one another across a table with a book or folder between them so that neither can see what the other is doing.

Give out the pictures and the frames to the students and ask one student (A) in each pair to arrange the 12 pictures in any order on the frame.

The other student should not be able to see what is happening.

The object of the game is for student B to arrange the pictures in the same order as student A. To do this, student A must describe the pictures to student B in terms of how the people in the pictures look or feel. Student B may ask questions.

When student B has arranged the pictures correctly, the two players may reverse roles – student B arranging the pictures and describing them to student A.

## 34

### How does it feel?

#### Type of activity

pair work  
information gap

#### Function practised

describing sensual experience

#### Exponent

*What does it feel/taste/smell/look like?*  
*It feels/tastes/smells/looks ... (+ adjective)*

#### Lexical area

adjectives for description of sensation

#### Essential vocabulary

*rough, smooth, sweet, sour, hot, cold, wet, dry, light, heavy, sharp, soft, hard, bright, shiny, furry, prickly, hairy, slippery*

#### How to use the game

Copy one set of pictures, one frame and a rules sheet for each student in the class.

The students should sit in pairs, facing one another across a table with a book or folder between them so that neither can see what the other is doing.

Give out the pictures and the frames to the students and ask one student (A) in each pair to choose any 12 of the pictures and arrange them in any order on the frame. The other student should not be able to see what is happening.

The object of the game is for student B to arrange the pictures in the same order as student A. To do this, student A must describe the pictures to student B in terms of how the objects taste, feel, look, smell. Student B may ask questions.

When student B has arranged the pictures correctly, the two players may reverse roles – student B choosing and arranging the pictures and describing them to student A.

It is not essential in the game for students to know the names of the objects in the pictures, although they may like to know them out of interest.

## 35

### Opinion poll

#### Type of activity

whole class  
matching

#### Function practised

asking and stating opinions

#### Exponent

*What do you think about ...?*  
*I think it/he/she's ... (+ adjective)*  
*I don't/So do I/Neither do I.*

#### Lexical area

adjectives for opinions

#### Essential vocabulary

*beautiful, ugly, frightening, boring, interesting, delicious, attractive, handsome, exciting, enjoyable, horrible, difficult, sexy, nice, silly, rubbish, fantastic, wonderful, dangerous, awful, pretty, a bad habit, a waste of time/money*

#### How to use the game

The game may be used with any number of students.

Copy enough cards for all the students in the class.

Make sure that each card appears twice.

Give out the cards to the students.

The object of the game is for each student to find someone whose opinions are exactly the same as theirs.

To do this, students must move around the class asking for and giving opinions on the subjects listed on their cards until they find someone who agrees with them about everything.

## 36

### Nosy neighbours

#### Type of activity

whole class  
information gap

#### Function practised

describing ongoing activities

#### Exponent

*What's happening in ...?*  
*What's ... doing?*  
*What are ... and ... doing?*  
*He's/She's ... -ing.*  
*They're ... -ing.*

#### Lexical area

everyday activities

#### Essential vocabulary

*have (a bath/a shower/tea/a party), answer (the phone), dry (the dishes), clean (teeth), cook, cry, play (the guitar), watch (TV), write (letters), sleep, make (tea/beds), eat, drink, do the washing-up, fight, paint (the house/a picture), read, dance, type, yawn, get up, play, fish, do (homework), study*

#### How to use the game

The game may be played with any number of students, from a minimum of eight.

Copy one large picture and one description for each student in the class.

Give out the cards to the students and tell them that they live in the street shown in the picture.

They live opposite the houses shown in the picture and they each have some information about what is going on in the houses. It is now 6 o'clock in the evening.

The object of the game is to find out what is happening in House number 5.

In order to do this, they will first have to read their descriptions and decide which pictures are referred to in that description. They should draw a line connecting the people described with the house they live in. They will then have to move around the class asking their 'nosy neighbours' what is happening in the other houses in the row, and connect people with houses in the same way.

Nobody has a description for House number 5, so they will have to find out what is going on in all the other houses in the row in order to eliminate all the possibilities.

They will then be left with one picture which shows what is going on in House number 5.

## 37

### Put it together

---

**Type of activity**

whole class, then small groups  
matching

**Function practised**

describing a scene

**Exponent**

present continuous tense for ongoing activities

**Lexical area**

everyday activities

**Essential vocabulary**

*picnic, sunbathe, walk, sleep, talk, catch, throw, run, fly, give, drown, swim, shout, look at, knit, play, carry, wave, look, write, light, chase, blow, eat, drink, take a photo, sit, take*

---

**How to use the game**

The game may be played with up to 20 students. For larger classes, divide the class into two groups.

Make one copy of each of the pictures and cut them up along the lines shown, into as many pieces as there are students in the class. When there are fewer students, the pictures can be cut up into fewer pieces; three or four, for example, instead of five.

Give out one piece to each student.

Tell them that the pieces together make up four large pictures.

**The object of the game is to find the other people who have pieces from the same picture.** To do this, students will have to move around the class describing their pictures to the people they meet.

When they have found the other people with pieces of the same picture, they should sit down somewhere in a group and try to work out in which order the pieces come from left to right. To do this, they will have to describe their pictures to each other in greater detail.

## 38

### Holiday quiz

---

**Type of activity**

small group  
guessing game

**Function practised**

asking about past events

**Exponents**

*Did you ...?*

*Yes, I did/No, I didn't.*

**Lexical area**

everyday activities

**\*Essential vocabulary**

*eat, see, visit, go to, have, etc.*, as required by students

---

**How to use the game**

Divide the students into groups of three or four and copy one set of pictures for each group.

The students should sit round a table with the cards placed face down in a pile in the middle of the group. They should take it in turns to pick up cards from the pile.

**The object of the game is for the other players to try and guess where the player holding the card went for his last holiday.** They do this by asking questions such as *Did you eat spaghetti? Did you see a kangaroo? Did you go to a bullfight?*

When they have guessed correctly the next player should pick up a card and the others should question him in the same way.

**Note:** This game is best set up by demonstration. Give one of the cards to a student and ask questions. Then take one of the cards yourself and get the class to ask you similar questions until they guess correctly.

\* As this is a guessing game it is difficult to predict in advance exactly what vocabulary will be required. The verbs suggested are a basic minimum.

## 39

### Robert's busy day

---

**Type of activity**

whole class  
information gap

**Function practised**

asking and talking about future arrangements or past events

**Exponent**

*What is he doing at ... o'clock?*

*He's ... -ing.*

or *What did he do at ... o'clock?*

*He ... -ed.*

**Lexical area**

social activities

**Essential vocabulary**

*catch, have (coffee/a drink/lunch/tea), meet, go to*

---

**How to use the game**

The game may be played with any number of students. Copy the diaries so that there is one for each student. Give out one diary to each student and tell them they each have a page of Robert's diary.

**The object of the game is to fill in all the diary entries.** To do this, students must move around the class asking

questions such as *What is he doing/did he do at ... o'clock?* Students may only ask one question at a time before moving on.

They may pass on information that they have obtained from other students, as well as the information that was originally on their page.

A similar game may be played using information about the students' own activities of the previous day or their arrangements for the next day. Ask the students to write a short account of their activities on the previous day or their arrangements for the next day.

Collect these in and use the information to prepare a short questionnaire with questions such as *Find someone who went/is going to the dentist at 11 o'clock yesterday/tomorrow.*

Students then interview each other to find the answers to the questions.

students will have to move about the class, asking questions to find out who is seeing John, when and where.

**Note:** The game may be used to practise either the present continuous tense (for fixed arrangements) or the simple past tense. Two versions of the questionnaire are therefore included and the teacher should select whichever is appropriate.

## 40

### Casanova's diary

---

#### Type of activity

whole class  
information search

#### Function practised

asking and talking about future arrangements  
or past events

#### Exponent

*What are you doing on ...?*  
*Are you ... -ing?*  
*When are you ... -ing?*  
or *What did you do on ...?*  
*Did you ...?*  
*When did you ...?*

#### Lexical area

social activities

#### Essential vocabulary

*guitar, dinner, class, foyer, party, tennis, club, folk music,  
dentist, doctor, drink, station, coach station, art class,  
picnic, disco, pottery, college*

---

#### How to use the game

The game may be played with 8 to 16 students. If there are more than 16 students, form two or more groups. Copy one diary and one questionnaire for every student in the class.

The essential diaries are numbers 1 to 8; the others are 'floaters'.

Numbers 1 to 7 should be given to women, if possible; number 8 should be given to a man.

Give out the diaries and the questionnaires to the students and tell them that the diary shows all their engagements for the coming/past week. Some of these activities involve a man called John.

**The object of the game is to find out as much as possible about John's activities during the coming/past week, and thus to complete the questionnaire. To do this,**

Elementary Communication Games, © J Hadfield 1984

**John Peters**  
Age: 26  
Lives in London  
Married  
Two children: Tim and Andy  
Job: technician  
Hobbies: tennis, football

**Elsie Lewis**  
Age: 65  
Lives in Hull  
Married  
Four children and six grandchildren  
Retired  
Hobbies: gardening

**Alice Summers**  
Age: 24  
Lives in Exeter  
Married  
Three children: Sally, Tom and Sue  
Job: nurse  
Hobbies: swimming, sailing

**Tim Fowler**  
Age: 36  
Lives in Brixham  
Married  
Two children: Robert and Oliver  
Job: electrician  
Hobbies: guitar

**Susie Parker**  
Age: 35  
Lives in Oxford  
Not married  
Job: policewoman  
Hobbies: knitting, cooking

**Tony Owen**  
Age: 24  
Lives in Brighton  
Not married  
Job: student  
Hobbies: drinking and talking

**Barbara Holbrook**  
Age: 54  
Lives in Bristol  
Married  
Two children: Tessa and John  
Job: housewife  
Hobbies: theatre, reading

**Jim Smith**  
Age: 28  
Lives in Southampton  
Married  
One child: Simon  
Job: accountant  
Hobbies: fishing

**Sam Stevens**  
Age: 43  
Lives in York  
Married  
Three children: Anne, Jane and Linda  
Job: fireman  
Hobbies: judo, football

**Chris Platt**  
Age: 31  
Lives in Maidstone  
Married  
No children  
Job: teacher  
Hobbies: gardening

**David Oldham**  
Age: 27  
Lives in Liverpool  
Not married  
Job: teacher  
Hobbies: woodwork, painting

**Steve Jenkins**  
Age: 24  
Lives in Glasgow  
Divorced  
No children  
Job: librarian  
Hobbies: crosswords

**Sally Jones**  
Age: 46  
Lives in York  
Not married  
Job: secretary  
Hobbies: playing the piano

**Harry Myers**  
Age: 62  
Lives in Birmingham  
Married  
Three children: Josephine, Rebecca and Edward  
Job: bank manager  
Hobbies: work

**Sarah Thomas**  
Age: 32  
Lives in Plymouth  
Not married  
Job: actress  
Hobbies: reading, art

**Celia Parsons**  
Age: 37  
Lives in London  
Married  
Two children: Patricia and Caroline  
Job: doctor  
Hobbies: pottery

# 7 CROSSROADS

## SOUFFLE

Separate 6 eggs and beat the whites until stiff.  
 Make a thick sauce using 2 ounces of butter, 2 ounces of flour and  $\frac{1}{2}$  pint of milk.  
 Melt the butter in a saucepan over low heat and add the flour.  
 Add the milk gradually, stirring all the time.  
 When the sauce is thick, add the egg yolks and 4 ounces of grated cheese.  
 Add the beaten egg white and mix well.  
 Turn into a soufflé dish and cook in a very hot oven for 25 minutes.

## CREME CARAMEL

Beat 6 eggs in a mixing bowl.  
 Heat  $1\frac{1}{2}$  pints of milk till nearly boiling and add to the beaten egg.  
 Take 6 ounces of sugar and add half to the custard mixture, with a little vanilla essence.  
 Place the rest in a saucepan with about  $\frac{1}{4}$  pint of water.  
 Heat until a dark syrup is formed.  
 Pour the syrup into an ovenproof dish and add the custard mixture.  
 Cook in a slow oven for 1 hour.

## CHOCOLATE CAKE

Cream together 4 ounces of sugar and 4 ounces of butter in a mixing bowl.  
 Add 2 eggs and beat thoroughly.  
 Add 4 ounces of flour, a little at a time.  
 Melt a bar of chocolate in a pan over low heat and add it to the mixture.  
 Pour into a greased tin and bake for 40 minutes at 350°C.

## OMELETTE

Beat 4 eggs in a basin.  
 Add a little milk, and whisk thoroughly.  
 Add a little salt and pepper.  
 Melt 2 ounces of butter in a frying pan and add the mixture.  
 Cook until solid and then turn on to a plate.

Find the number of the bus you want and join the queue at the right bus stop.  
How often does the bus go?  
When is the next one?

## A

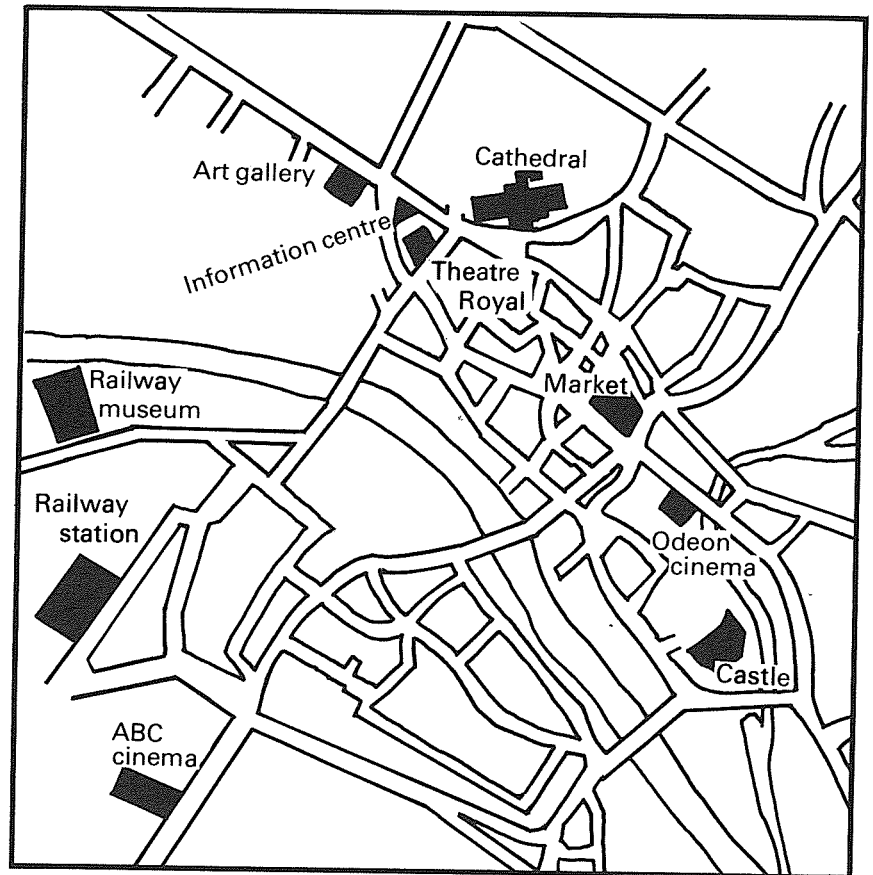

It is Tuesday 4 December.  
 You are going to York for the day.  
 You arrive at 9.30am.  
 The last train home leaves at 22.35.  
 You want to:

- visit the castle
- go to the Railway Museum
- go to the art gallery
- visit the cathedral
- go to the market
- see a play or a film

You want to plan your day, so ring up York Tourist Information Centre and ask about opening and closing times.

Decide what you are going to do and when you are going to do it. You may not be able to do everything!

Draw in your route on the map.

## B

It is Tuesday 4 December.

## A

You live in north-west London.  
You work in a supermarket 10 miles away.  
The train journey takes 40 minutes.  
Your mother works in a hairdresser's about five miles away.  
She goes to work by bus and it takes her about half an hour.  
Your father walks to the chemist's shop where he works.  
It's about a mile and takes him 20 minutes.  
Your brother always cycles to work.  
He works in a travel agent's about seven miles away and the journey takes about 45 minutes.

## C

You live in north-east London.  
You work in a library and you go to work by train.  
The library is seven miles away and the journey takes 35 minutes.  
Your mother works in a shoe shop one mile away.  
She walks to work – it takes 20 minutes.  
Your father drives to work.  
He works in a garage 10 miles away and the journey takes him 40 minutes.  
Your brother goes to work by bike.  
He works in a bank and the five-mile journey takes him half an hour.

## B

You live in the country to the south-west of London.  
You work in a café about six miles away.  
You drive to work – the journey takes about 25 minutes.  
Your father works in a school about a mile away.  
He goes to work by bus – it takes 10 minutes.  
Your mother works in a hotel.  
She walks there every day.  
The hotel is a ten-minute walk – about half a mile.  
Your sister goes to work by train.  
She works in a post-office in London and the 20-mile journey takes about 40 minutes.

## D

You live in south-east London.  
Your father works in a factory about a mile from your house.  
He always walks to work – it takes him about 15 minutes.  
Your mother is a nurse and works in a hospital about four miles away.  
She goes to work by car.  
The journey takes about 20 minutes.  
Your brother goes by motorcycle to the restaurant where he works.  
The five-mile journey takes 25 minutes.  
And you? You are very lazy – you get a taxi to work every morning! You work in an office half a mile away.  
It takes five minutes.

You get up early – at about 7 o'clock and go to bed early – at about 10 o'clock.  
 You don't smoke or drink.  
 You like a quiet life. You read a lot but never watch TV.  
 You play the violin and like classical music. You often play the violin during the day.  
 You are a very tidy person and clean the house every day.

You get up early and go to bed early. You usually go to bed at about 10.30 pm and get up at about 7 o'clock.  
 You like eating and drinking and cook a lot of large meals.  
 You smoke but you want to give it up.  
 You have an active social life and you go out most evenings.  
 You like pop music and you play the guitar. You practise a lot during the day.  
 You are a tidy person and clean the house every day.

You get up late – at about 10 or 11 o'clock and go to bed late – about 1 o'clock or 2 o'clock in the morning.  
 You are a heavy smoker.  
 You have a lot of friends and a busy social life. You invite people to your house a lot and often give parties.  
 You are very untidy and don't clean the house very often.  
 You love animals and have a cat.

You work at night so you sleep during the day. You go to bed at about 7 o'clock in the morning and usually get up at about 3 o'clock in the afternoon.  
 You are a heavy smoker.  
 You have a lot of friends and invite them round in the evenings.  
 You play the trumpet and belong to a jazz group. You sometimes practise together in the evenings.  
 You are a tidy person and clean the house every day.

You get up early and go to bed early. You usually get up at about 7.30 and are always in bed by 11 o'clock.  
 You are a heavy smoker, but you are on a diet so you don't eat very much.  
 You like a quiet life and you spend a lot of time alone.  
 You often watch TV in the evenings.  
 You are very untidy – you don't clean the house very often and sometimes you don't wash up for two or three days!

You are a vegetarian and never eat meat.  
 You work very hard – you write books and work at home. You often work late at night and type until 2 o'clock or 3 o'clock in the morning.  
 You like a quiet life – you can't work with a lot of people in the house.  
 You are a heavy smoker.  
 You are very untidy and never clean the house.

**1** You like fresh air and exercise!  
 You often go cycling at weekends.  
 You play golf on Sundays and you go riding every Saturday afternoon.  
 In the summer you also play tennis and go swimming once a week.  
 In your holidays you go walking in the mountains.

**2** You like adventure!  
 You go climbing every summer and skiing every winter.  
 You go flying and deep-sea diving at weekends.  
 You want to try parachuting!

# 40 CASANOVA'S DIARY (Questionnaire for future arrangements)

- 1 Find out the answers to these questions.  
Ask other people if they are seeing John next week.

When is John going to the cinema?

Who is he going with?

Who is he taking to Luigi's restaurant on Tuesday?

What is he doing on Thursday?

Who is he meeting at 6 o'clock?

Who is going out for a drink with John on Wednesday?

Who is he taking to the party on Friday?

What is he doing on Sunday evening?

Who is he taking to the disco on Saturday?

- 2 Fill in John's diary for next week.

|                  |
|------------------|
| <b>Monday</b>    |
| <b>Tuesday</b>   |
| <b>Wednesday</b> |
| <b>Thursday</b>  |
| <b>Friday</b>    |
| <b>Saturday</b>  |
| <b>Sunday</b>    |

- 3 Which student is John?

- 4 What is happening on Friday?  
Who is going to get a surprise?

- 1 Find out the answers to these questions.  
Ask other people if they saw John last week.

When did John go to the cinema?

Who did he go with?

Who did he take to Luigi's restaurant on Tuesday?

What did he do on Thursday?

Who did he meet at 6 o'clock?

Who went out for a drink with John on Wednesday?

Who did he take to the party on Friday?

What did he do on Sunday evening?

Who did he take to the disco on Saturday?

- 2 Fill in John's diary for last week:

|                  |
|------------------|
| <b>Monday</b>    |
| <b>Tuesday</b>   |
| <b>Wednesday</b> |
| <b>Thursday</b>  |
| <b>Friday</b>    |
| <b>Saturday</b>  |
| <b>Sunday</b>    |

- 3 Which student is John?

- 4 What happened on Friday? Who got a surprise?

## 5

### Time zones

#### RULES

- 1 Play this game in groups of three or four.
- 2 There are two sets of cards: *time cards* (with pictures) and *information cards* (with words).
- 3 Put the *time cards* face down in the middle of the table.
- 4 Take one *information card* each. If there are only three people in your group, put the fourth card on the table so everyone can see it.
- 5 Player 1 starts. Take a *time card* from the pile.
- 6 This card shows the time in one of the five towns. Tell the other players the time. Say, *It's ... o'clock in ...*
- 7 Then ask the time in the other towns. Ask the other players, *What's the time in ...?*
- 8 Draw in the time on the clock faces.
- 9 Then it is the next player's turn.

## 7

### Crossroads

#### RULES

- 1 Work in groups of three or four.
- 2 Take one plan of the shopping centre each.
- 3 Player 1 must begin. Say something about your plan, for example, *The post office is next to the chemist.*
- 4 The other players must fill in their plans. If you can't fill in your plan immediately, make a note of the information and wait. It will be useful later.
- 5 Then it is the next player's turn.

## 10

### Shopping around

#### RULES

- 1 Play this game in groups of three or four.
- 2 Take one *shopping list* and one *price list* each.
- 3 You must find the cheapest place to buy each thing on your list.
- 4 Player 1 must start. Ask the others, *How much is/are ...?* Find the cheapest place. Write the price down on your list.
- 5 Then it is the next player's turn. Go round the group.
- 6 At the end, add up the total. Who spent the most and the least on shopping?

## 17

### Getting there on time

#### RULES

- 1 Work together in your groups.
- 2 Each take a card from the pile.
- 3 Read the card and go to the bus station, airport or railway station to ask about times. Ask,

|            |                       |            |     |            |                                 |   |
|------------|-----------------------|------------|-----|------------|---------------------------------|---|
| Is there a | bus<br>train<br>plane | to<br>from | ... | on ... day |                                 | ? |
|            |                       |            |     | in the     | morning<br>afternoon<br>evening |   |

|              |                 |   |
|--------------|-----------------|---|
| When does it | leave<br>arrive | ? |
|--------------|-----------------|---|

- 4 When you have found the right answer, go back to your group and write the answer on the answer sheet.
- 5 Then take another card.

28

## Sunday afternoon

### RULES

- 1 Play this game in groups of three or four.
- 2 There are two sets of cards; *role-cards* (A, B, C and D) and *situation cards* (1, 2, 3, 4, 5 and 6). Take one *role-card* each and place the *situation cards* (in order) in a pile in the middle of the table.
- 3 Imagine you are a family of three or four people. It is Sunday afternoon. You are all sitting at home and feeling bored. Read your *role-card*. There is a list of things *you would like to do* and things *you don't want to do*.
- 4 Now turn up *card number 1*. Read it.
- 5 Make suggestions of things to do. Use the ideas on your *role-card*.
- 6 When you all agree on something to do, turn up *card number 2*. Read that and ...
- 7 ... start again ....

30

## Do me a favour

### RULES

- 1 Deal eight cards to each player.
- 2 Put the rest of the cards face down in a pile in the middle.
- 3 Look at your cards. They have a question mark  or a tick  in the corner.  cards are *request cards*.  cards are *reply cards*. If you have two that match, throw them away.
- 4 Now begin the game.
- 5 Player number 1 chooses a  card and asks any other player to do what is shown on the card, for example, *Lili, can/could you open the door, please?*
- 6 If Lili has a corresponding  card, she must give it to the first player and say, *Yes, of course* or *Sure*, or *OK*. The first player can then throw both cards away and have another turn.
- 7 If Lili hasn't got the right  card, she must make an excuse and say, for example, *I'm sorry, I'm busy at the moment* or *Sorry, I can't, I'm going out*. Then the first player must pick up a card from the pile.
- 8 Then it is the second player's turn ...
- 9 The first player to finish all of his/her cards is the winner.

33

## Feelings

### RULES

- 1 Play this game in pairs.
- 2 Sit facing each other across a table.
- 3 Put a book between you so that you cannot see what the other person is doing.
- 4 Player 1 must choose 12 pictures and arrange them in any order on the frame.
- 5 He/She must then describe the pictures to the other player. Say, *He looks angry* or *She looks sad*, etc.
- 6 Player 2 must arrange the pictures in the same order as player 1. You can ask questions, for example, *Does he look tired?* etc.

34

## How does it feel?

### RULES

- 1 Play this game in pairs.
- 2 Sit facing each other across a table.
- 3 Put a book between you so that you cannot see what the other person is doing.
- 4 Player 1 must choose 12 pictures and arrange them in any order on the frame.
- 5 Player 1 then describes the pictures to player 2. Do not say the names of the objects. Say, *It looks/feels/tastes/smells ...*
- 6 Player 2 must arrange the pictures in the same order. You can ask questions, for example, *What does it feel like? Does it taste sweet?*

**Elementary COMMUNICATION Games** is a collection of 40 games for elementary students of English. It offers:

- photocopiable material for a wide variety of games
- pairwork, small group and whole class activities
- language practice with real communication
- functional, structural and lexical indexes of the games
- teacher's notes on how to play each game
